

Rare, Threatened, & Endangered Species & Natural Communities
 Tracked by the Louisiana Natural Heritage Program
 West Feliciana Parish - April 2008

PARISH: West Feliciana

Scientific Name	Common Name	State Rank	Global Rank	State Status	Federal Status
<i>Actaea pachypoda</i>	White Baneberry	S2	G5		
<i>Asarum canadense</i>	Canada Wild-ginger	S1	G5		
<i>Batture (riverfront pioneer)</i>	Batture	S4S5	G4G5		
<i>Brachycercus flavus</i>	Yellow Brachycercus Mayfly	S1	G4		
<i>Campostoma anomalum</i>	Central Stoneroller	S2	G5		
<i>Celastrus scandens</i>	Climbing Bittersweet	S1	G5		
<i>Chamaelirium luteum</i>	Fairy Wand	S2S3	G5		
<i>Circaea lutetiana ssp. canadensis</i>	Intermediate Enchanter's Nightshade	S2	G5T5		
<i>Cypress-tupelo swamp</i>	Cypress-tupelo Swamp	S4	G3G5		
<i>Cyprinella camura</i>	Bluntnose Shiner	S2S3	G5		
<i>Deparia acrostichoides</i>	Silvery Glade Fern	S2	G5		
<i>Dichantheium clandestinum</i>	Deer-tongue Witchgrass	S4	G5?		
<i>Diplazium pycnocarpon</i>	Glade Fern	S2	G5		
<i>Dryopteris ludoviciana</i>	Southern Shield Wood-fern	S2	G4		
<i>Etheostoma caeruleum</i>	Rainbow Darter	S2S3	G5		
<i>Frasera caroliniensis</i>	Carolina Gentian	SH	G5		
<i>Hackberry-american elm-green ash forest</i>	Hackberry-American Elm-Green Ash Bottomland Forest	S4	G4G5		
<i>Haliaeetus leucocephalus</i>	Bald Eagle	S2N,S3B	G5	Endangered	Delisted
<i>Helmitheros vermivorus</i>	Worm-eating Warbler	S4B	G5		
<i>Heuchera americana</i>	American Alumroot	S2	G5		
<i>Hexalectris spicata</i>	Crested Coral-root	S2	G5		
<i>Magnolia pyramidata</i>	Pyramid Magnolia	S2	G4		
<i>Mustela frenata</i>	Long-tailed Weasel	S2S4	G5		
<i>Overcup oak-water hickory forest</i>	Overcup Oak-Water Hickory Bottomland Forest	S4	G4?		
<i>Pachysandra procumbens</i>	Allegheny-spurge	S2	G4G5		
<i>Panax quinquefolius</i>	American Ginseng	S1	G3G4		
<i>Physalis carpenteri</i>	Carpenter's Ground-cherry	S1	G3		

Rare, Threatened, & Endangered Species & Natural Communities
 Tracked by the Louisiana Natural Heritage Program
 West Feliciana Parish - April 2008

PARISH: West Feliciana

Scientific Name	Common Name	State Rank	Global Rank	State Status	Federal Status
<i>Platythelys querceticola</i>	Low Erythrodes	S1	G3G5		
<i>Plethodon websteri</i>	Webster's Salamander	S1	G3	Prohibited	
<i>Ponthieva racemosa</i>	Shadow-witch Orchid	S2	G4G5		
<i>Saxifraga virginiana</i>	Virginia Saxifrage	SH	G5		
<i>Schisandra glabra</i>	Scarlet Woodbine	S3	G3		
<i>Seiurus motacilla</i>	Louisiana Waterthrush	S3S4B	G5		
<i>Setophaga ruticilla</i>	American Redstart	S3B	G5		
<i>Silphium perfoliatum</i>	Carpenter's Square	S1?	G5		
Small stream forest	Small Stream Forest	S3	G3		
Sorex longirostris	Southeastern Shrew	S2S3	G5		
Southern mesophytic forest	Southern Mesophytic Forest	S2S3	G1G2		
Spilogale putorius	Eastern Spotted Skunk	S1	G5		
State champion tree	State Champion Tree	SNR	GNR		
Triphora trianthophora	Nodding Pogonia	S2	G3G4		
Waterbird Nesting Colony	Waterbird Nesting Colony	SNR	GNR		

EXPLANATION OF RANKING CATEGORIES EMPLOYED BY NATURAL HERITAGE PROGRAMS NATIONWIDE

Each element is assigned a single global rank as well as a state rank for each state in which it occurs. Global ranking is done under the guidance of NatureServe, Arlington, VA. State ranks are assigned by each state's Natural Heritage Program, thus a rank for a particular element may vary considerably from state to state. Federal ranks are designated by the U.S. Fish & Wildlife Service under the provisions of the Endangered Species Act of 1973. **DISCLAIMER:** This document is not an official copy of the laws in effect and should not be utilized or relied upon as such. For this reason, the accuracy of the information contained within this document cannot be guaranteed and the reader is cautioned that it is his/her responsibility to be apprised of the laws in effect at any given time. These laws include those contained within the Louisiana Revised Statutes, particularly Title 56, the official regulations of the Louisiana Wildlife and Fisheries Commission, federal laws, and any local or parish ordinances.

FEDERAL RANKS (USES A FIELD):

LE = Listed Endangered

LT = Listed Threatened

PE = Proposed endangered

PT = Proposed Threatened

C = Candidate

PDL = Proposed for delisting

E (S/A) or T (S/A) = Listed endangered or threatened because of similarity of appearance

XE = Essential experimental population

XN = Nonessential experimental population

No Rank = Usually indicates that the taxon does not have any federal status. However, because of potential lag time between publication in the Federal Register and entry in the central databases and state databases, some taxa may have a status which does not yet appear.

(Rank, Rank) = Combination values in parenthesis = The taxon itself is not named in the Federal Register as having U.S. ESA status; however, all of its infraspecific taxa (worldwide) do have official status. The statuses shown in parentheses indicate the statuses that apply to infraspecific taxa or populations within this taxon. *THE SPECIES IS CONSIDERED TO HAVE A COMBINATION STATUS IN LOUISIANA*

(PS) = partial status = Status in only a portion of the species' range. Typically indicated in a "full" species record where an infraspecific taxon or population has U.S. ESA status, but the entire species does not. *THE SPECIES DOES NOT HAVE A STATUS IN LOUISIANA*

(PS: Rank) = partial status = Status in only a portion of the species' range. The value of that status appears because the entity with status does not have an individual entry in NatureServe. *THE SPECIES MAY HAVE A STATUS IN LOUISIANA*

GLOBAL ELEMENT RANKS:

G1 = critically imperiled globally because of extreme rarity (5 or fewer known extant populations) or because of some factor(s) making it especially vulnerable to extinction

G2 = imperiled globally because of rarity (6 to 20 known extant populations) or because of some factor(s) making it very vulnerable to extinction throughout its range

G3 = either very rare and local throughout its range or found locally (even abundantly at some of its locations) in a restricted range (e.g., a single physiographic region) or because of other factors making it vulnerable to extinction throughout its range (21 to 100 known extant populations)

G4 = apparently secure globally, though it may be quite rare in parts of its range, especially at the periphery (100 to 1000 known extant populations)

G5 = demonstrably secure globally, although it may be quite rare in parts of its range, especially at the periphery (1000+ known extant populations)

GH = of historical occurrence throughout its range; i.e., formerly part of the established biota, with the possibility that it may be rediscovered (e.g., Bachman's Warbler)

GU = possibly in peril range-wide, but status uncertain; need more information

G? = rank uncertain. Or a range (e.g., G3G5) delineates the limits of uncertainty

GQ = uncertain taxonomic status

GX = believed to be extinct throughout its range (e.g., Passenger Pigeon) with virtually no likelihood that it will be rediscovered

T = subspecies or variety rank (e.g., G5T4 applies to a subspecies with a global species rank of G5, but with a subspecies rank of G4)

STATE ELEMENT RANKS:

S1 = critically imperiled in Louisiana because of extreme rarity (5 or fewer known extant populations) or because of some factor(s) making it especially vulnerable to extirpation

S2 = imperiled in Louisiana because of rarity (6 to 20 known extant populations) or because of some factor(s) making it very vulnerable to extirpation

S3 = rare and local throughout the state or found locally (even abundantly at some of its locations) in a restricted region of the state, or because of other factors making it vulnerable to extirpation (21 to 100 known extant populations)

S4 = apparently secure in Louisiana with many occurrences (100 to 1000 known extant populations)

S5 = demonstrably secure in Louisiana (1000+ known extant populations)

(B or N may be used as qualifier of numeric ranks and indicating whether the occurrence is breeding or nonbreeding)

SA = accidental in Louisiana, including species (usually birds or butterflies) recorded once or twice or only at great intervals hundreds or even thousands of miles outside their usual range

SH = of historical occurrence in Louisiana, but no recent records verified within the last 20 years; formerly part of the established biota, possibly still persisting

SR = reported from Louisiana, but without conclusive evidence to accept or reject the report

SU = possibly in peril in Louisiana, but status uncertain; need more information

SX = believed to be extirpated from Louisiana

SZ = transient species in which no specific consistent area of occurrence is identifiable

STATE PROTECTION STATUS:

State status are contained in Title 56 of the Louisiana Revised Statutes as well as relevant rules and regulations adopted by the Louisiana Wildlife and Fisheries Commission and the Secretary of the Department of Wildlife and Fisheries. The Secretary of the Department of Wildlife and Fisheries is authorized to implement additional restrictions in emergency situations in order to protect fish and wildlife resources.

Endangered = Taking or harassment of these species is a violation of state and federal laws.

Threatened = Taking or harassment of these species is a violation of state and federal laws.

Threatened/Endangered = Taking or harassment of these species is a violation of state and federal laws.

Prohibited = Possession of these species is prohibited. No legal harvest or possession.

Restricted Harvest = There are restrictions regarding the taking and possession of these species
