
These corrections are arranged by the Chapters and sections of the *Wildlife Action Plan* (a.k.a. WAP). Chapters or sections not included herein have no errors identified.

This Corrigenda addresses only minor misspellings, incorrect sentence structure, or incorrect cross-referencing of text or tables. No changes have been made to any of the “8 elements” required by the U.S. Fish and Wildlife Service. There are no changes to the listed species of conservation concern or priority habitats. There are no changes in conservation strategies.

Errors and inconsistencies have been identified through the course of using the WAP as a reference for conservation and management. This Corrigenda should not be considered an exhaustive list of needed corrections. Additional changes or re-structuring may be required at a later date.

The LDWF plans a major revision of the WAP circa 2015. This anticipated revision will address changes of congressional mandates, changes in Louisiana Department of Wildlife and Fisheries (LDWF) priorities, and/or changes in the legislation authorizing the federal State Wildlife Grant program. According to U.S. Fish and Wildlife Service guidance, major revisions require public involvement and comment. Major revisions to a state’s Wildlife Action Plan must be approved by the U.S. Fish and Wildlife Service. This Corrigenda has been determined to be a minor revision (U.S. Fish and Wildlife Service letter, October 26, 2007). As such, revisions to the species included, the habitats described, or the conservation strategies discussed are outside the scope of this Corrigenda.
TITLE AND ACKNOWLEDGEMENT PAGE

There are two minor errors in the acknowledgements and suggested citation information. The corrected text is indicated below in blue.

Contributing Authors

Doug B._Albert (i.e., insert space)

Suggested citation:
(i.e., remove superfluous period after “Gary”)

EXECUTIVE SUMMARY

The executive Summary has only one minor correction in the first sentence. Below is the corrected sentence, with the added text in blue.

Change FIRST SENTENCE To:

Louisiana serves as a permanent or temporary home to over 900 species of vertebrate animals and an unknown number of invertebrate species.
---

# TABLE OF CONTENTS

The Table of Contents contains inconsistencies in formatting. Some page numbers and Section Headings do not match the actual page or content, respectively. Below is the corrected Table of Contents (corrected chapters only), with the added or corrected lines in blue.

LIST OF ACRONYMS

Several omissions and superfluous acronyms were included in the final list presented on page xix. Below are the corrected acronyms, with explanations provided underneath.

Deletions:

BSG Bird Study Group²
CZMA Coastal Zone Management Act¹
GSMFC Gulf States Marine Fisheries Commission¹
IBA Important Bird Area¹
LCES Louisiana Cooperative Extension Service²
LCRP Louisiana Coastal Resources Program¹
LDED Louisiana Department of Economic Development¹
LPB Lake Pontchartrain Basin²
PCB Polychlorinated biphenyl¹
TPWD Texas Parks and Wildlife Department²

The above acronyms should be deleted for the following reasons:
¹ Neither the acronym nor the full item was found in the WAP text.
² The item / entity was in the WAP text but was never abbreviated or did not occur frequently enough to warrant abbreviation.

Additions:

RTE Rare, threatened, and endangered species

This acronym occurred in Chapter 1 and was defined in the text. However, it was omitted from the acronym list, and should be added.
CHAPTER 1. INTRODUCTION

Several minor corrections or revisions are required in Chapter 1. These are organized below according to the section and sub-section in which the required changes occur. Below are the corrected sentences, with the corrected text in blue.

A. 2. Five-year Plan 2006-2010: (pg. 1)

“CWCS” had not yet been defined in the main text body. Final sentence, change to:

The strategic plan is currently undergoing a revision and it is anticipated that many of the recommendations of the Comprehensive Wildlife Conservation Strategy (CWCS) will be incorporated into the revision.

B. 2. Congressional Mandate and Guidance: (pp. 2-3)

Revision required by the revision in A.2., above. Change final sentence of first paragraph to:

In creating these new funding measures, Congress also required each state and territory to develop a CWCS by October 1, 2005.

C. 3. Goals and Objectives: (pp. 4-6)

Revision to Goal 4 to make it consistent with Goal 4, as listed in Table 8.7, pg. 329. Change Goal 4 text to:

Goal 4: Partnerships (pg. 5)
Improve existing partnerships and develop new partnerships between LDWF and State and Federal natural resource agencies, non-governmental organizations and environmental groups, private industry, academia, and the general public.

Also, the final sentence of sub-section C.3. is ambiguous. In reference to a habitat v. species approach, change the final sentence of sub-section C.3. to:

To be successful in accomplishing Habitat and Species Conservation objectives, LDWF will include a diverse array of stakeholders made up of federal, state, and local government agencies, non-governmental organizations (NGO’s), businesses and industry, and private landowners in the development and implementation of the CWCS.

C. 5. Looking to the Future: (pg. 7)

An acronym was not defined and not properly cross-referenced to the List of Acronyms (pp. xix – xxi). In the bulleted list of CWCS evaluation questions to be asked, change the 6th bullet text to:
• Were new Memoranda of Understanding (MOU) completed with partners?
CHAPTER 2. STATE OVERVIEW

Several minor corrections or revisions are required in Chapter 2. These are organized below according to the section and sub-section in which the required changes occur. Below are the corrected sentences, with the corrected text in blue.

A. 2. Geology: (pg. 9)

In the discussion of the geologic age of Louisiana’s soil, the term “age” was incorrectly used to describe the tertiary geologic time unit. “Age” is a sub-epoch unit of geologic time, whereas the Tertiary time unit is a “Period”. Similarly, the percentages given to total the origin of sediments shifts between “Epoch” (Holocene and Pleistocene, not identified as Epochs) to “Period” (incorrectly called “age”). In the first paragraph, change the first and second sentences to:

Geologically, most (80%) of Louisiana’s surface area consist of Quaternary Period sediments. Holocene alluvial sediments deposited by the Mississippi, Red, Ouachita, and other rivers constitute 55% of the surface area, and 25% of the state’s surface is occupied by deposits associated with Pleistocene terraces. The final 20% comprises strata of Tertiary Period sediments, principally on the Sabine uplift…

B. 1. Land Ownership: (pg. 13)

An acronym is not defined in a citation. Change the citation in the second paragraph, second sentence to:

Private, non-industrial landowners own 62% of the state’s forestland, forest product industries own 29%, and the remaining 95 is in state or federal ownership (Louisiana Department of Agriculture and Forestry 2004).

D. 1. Terrestrial Systems:

At the end of the introductory paragraph, add:

Following are summaries of each ecoregion and major public landowners. Complete listings of public managed land are provided in Appendix A.
D. 1. b. Upper East Gulf Coastal Plain:  (pg. 17)

Change the last few sentences of the summary to include portions of the Louisiana State Penitentiary.

The only state WMA is Tunica Hills. State historic sites include Locust Grove and Audubon. Portions of the Louisiana State Penitentiary lie within the UEGCP, including over 10,000 acres of agriculture/cropland/grassland, and Lake Killarney. (Fig. 2.5, Appendix A).

D. 1. d. Upper West Gulf Coastal Plain:  (pg. 19)

Add a final sentence to include a Louisiana National Guard facility.

Federal lands include the upper parts of Red River, Upper Ouachita, and D’Arbonne NWRs, and the Caney Ranger District of Kisatchie National Forest (KNF). Military lands include the Barksdale Air Force Base (AFB), and the Louisiana Army National Guard’s Camp Minden.
CHAPTER 3. APPROACH

A. 4. Cooperation with Other States (pg. 33)

The acronym “USFWS” is first used on page 33 but is first defined on page 36.

LDWF is a member of the Southeast Association of Fish and Wildlife Agencies (SEAFWA) Ad-hoc committee that is comprised of states in the U.S. Fish & Wildlife Service (USFWS) Region 4.

D. 1. Amphibians and Reptiles: (pg. 36)

In the second paragraph, “USFWS” no longer needs to be defined per correction above.

“…is considered threatened. USFWS recovery plans have been developed…”

Also in the second paragraph, the two-word term “sea turtle” is used. In most of the WAP, the one-word term “seaturtle” is used. In future revisions, this inconsistency should be corrected. Either can be appropriate, depending on the source of information. According to Jeff Boundy (who checked a herpetofauna tome), perhaps future editors should consider the two-word version to use throughout.

D. 3. Mammals: (pg. 39)

In the final paragraph, an incorrect common name is used. The name given does not match the common name used subsequently. In the final sentence of the final paragraph, correct:

As a result of their review, two bat species were added (southeastern myotis and northern myotis) and there was one recommendation to keep the ringtail in the target species list.

E. 1. Terrestrial Habitats (pg. 43)

In the middle of the final paragraph of this section, a preposition needs to be exchanged.

Louisiana contains six ecoregions (Fig. 2.3) or areas of general similarity in ecological systems and natural resources present in those areas.
CHAPTER 4. CONSERVATION HABITATS & SPECIES ASSESSMENTS

A. Terrestrial Habitats  (Summary list provided as Appendix G)

A. 13. Coastal Prairies (pp. 105-109)

An author’s name was misspelled in a reference on page 107.

Ornate Box Turtle: Initiate surveys in areas identified by SWG project T20 (Lorenz et al. 2004) to update…

A. 20. Intermediate Marsh (pp. 144-148)

There is a minor formatting inconsistency on page 146.

Species Conservation Strategies:

4. Whooping Crane:  
Continue to work with…

A. 26. Salt Marsh (pp. 171-174)

The rarity rank listed is incorrect.

Rarity Rank: S3S4 / G5

A. 33. Spruce Pine-Hardwood Flatwood (pp. 203-206)

Correct a misspelling / punctuation error.

Priority Species Research and Survey Needs:

Southeastern Shrew: Together with Arkansas and Missouri, Louisiana represents…
B. 2. Marine Habitats (pp. 282-291)

The table summarizing marine species of conservation concern did not include two seaturtles that are included in Appendix F.

<table>
<thead>
<tr>
<th>MARINE SPECIES OF CONSERVATION CONCERN (21)</th>

<td>Leatherback Seaturtle</td>
</tr>
</tbody>
</table>
CHAPTER 5. GENERAL CONSERVATION STRATEGIES

C. 3. Education / Outreach: (pg. 297)

Although the term “right-of-way” is used several times in previous sections of the WAP, the acronym has not been used until Chapter 5. Here, we define the acronym. However, future revisions of the WAP should define the acronym after the first use of the term “right-of-way” rather than the first use of the acronym.

- Produce a set of BMPs for improving wildlife habitat in utility rights-of-way (ROW).

C. 4. Invasive Species: (pg. 297)

Another acronym is not defined.

- Partner with local hunting clubs through the Deer Management Assistance Program (DMAP) to support wild hog eradication.

C. 5. Working with Legislators: (pp. 297-298)

The last bullet point on page 297 is replicated as the first bullet point on page 298. The duplicate bullet point should be deleted in future WAP revisions.
CHAPTER 6. DEVELOPING PARTNERSHIPS

Errors in Chapter 6 are few and minor. Generally, they consist of mistyped acronyms. The only other error was in the opening paragraph, where a reference is less precise than it should have been.

In the opening paragraph, change the last sentence as follows:

The list of organizations LDWF invited to focus meetings (Chapter 3, Sections A.2 – A.4) illustrates a new attempt at expanding its partnerships.

The following revisions are for line items in a multi-page table. Acronym corrections include:

**LANDOWNERS (corporations and individuals):**

Pg. 300

<table>
<thead>
<tr>
<th>BARRIER ISLAND LIVE OAK FOREST</th>
<th>Partner with NGOs (TNC, LOS, NOS NAS), state and federal agencies, industry, and private landowners to promote the conservation of remaining barrier island live oak forests.</th>
</tr>
</thead>
</table>

Pg. 301

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**LOUISIANA DEPARTMENT OF ENVIRONMENTAL QUALITY:**

Pg. 303

<table>
<thead>
<tr>
<th>SMALL STREAM FOREST</th>
<th>Form a committee composed of gravel mining interests, DEQ, LDEQ, LDNR, TNC, and other interested groups to develop BMPs for current and proposed gravel mines to prevent or reduce their impacts to streams and surrounding forest habitat.</th>
</tr>
</thead>
</table>
CHAPTER 7.  CONSERVATION PRIORITIES

The terms “Tier I” and “Tier II” are defined and explained in Chapter 3, pages 49-50. Habitat priorities discussed throughout the WAP are summarized in Chapter 7. For most entries, Tiers I and II are displayed in the Table correctly. However, a few habitat types meet the definition of Tier II but are incorrectly listed in the Table as Tier I. The corrected test is in blue.

<table>

</table>
CHAPTER 8. RESEARCH AND MONITORING

There is an inconsistent sentence structure in the opening bullet list. In the opening paragraph, change the list as follows:

Research and monitoring aspects of this plan are complex. Clearly they should:
• Be hypothesis-driven with clearly defined objectives
• Be based on sensitive indicators of change
• Be based on mechanistic or causal relations between indicators and system state
• Have a sampling strategy appropriate for detecting change
• Have a format and framework for organizing, analyzing, storing, and retrieving the monitoring data
• Have a procedure for incorporating monitoring results into future decision making

C. 1. Aquatic Habitats and Species:

C.1.a. Freshwater (pg. 319)

In the third paragraph, correct the misspelled word.

Monitoring efforts will be geared toward identifying trends in the current range and abundance of these species, particularly the Asian carps and Zebra mussel, and what impact they are having on native species.

D. Measuring Strategy Success: (pg. 324)

The first sentence, third paragraph, on page 313 references a need for biological and programmatic monitoring. On page 316, Section C “Biological Monitoring” is clearly indicated. However, Section Title D is less clear. Therefore, Section D title should be changed as follows:

D. Programmatic Monitoring – Measuring Strategy Success
Table 8.8. Effectiveness of the strategies: (pg. 329)

Correct the misspelling under “Adaptive management…” (fourth row, third column)

<table>

<td>Program supervisors, Core Committee</td>
</tr>
</tbody>
</table>
APPENDIX A – MANAGED AREAS BY ECOREGION

Appendix A was assembled using Geographic Information System data available to the LDWF at the time the CWCS was being drafted. These data are updated and expanded each year. New public areas are purchased, additional private land is placed under conservation agreements, and previously conserved land may change status. Future revisions of the CWCS should include a thorough review and updating of Appendix A and the associated maps and tables.

While the data in Appendix A were correct at the time the WAP was published, there are a few omissions or corrections that should be included in future revisions.

**Mississippi River Alluvial Plain:**

Add Louisiana State Penitentiary.

**Upper East Gulf Coastal Plain:**

Add Louisiana State Penitentiary;
Add Locust Grove State Commemorative Area.

**Upper West Gulf Coastal Plain:**

Consider changing name of “La Army Ammunition Plant” to “Louisiana Army National Guard – Camp Minden”.
APPENDIX G – LOUISIANA TERRESTRIAL HABITATS

There is an inconsistency regarding Western Upland Longleaf Pine Forest. Throughout most of the CWCS, the Western Upland Longleaf Pine Forest habitat is considered a Tier I habitat – only occurring in the Lower West Gulf Coastal Plain ecoregion. It is reported as only occurring in the Lower West Gulf Coastal Plain in Chapter 7 and in Appendix M. The parish distribution map in Chapter 4 includes parishes that lie on the border of two ecoregions, but these maps are not intended to specify where in those parishes the habitat occurs.

A data review was completed for the WAP Corrigenda, and the LDWF Natural Heritage Program confirmed that the Western Upland Longleaf Pine Forest habitat is a Tier I habitat – occurring in the Lower West Gulf Coastal Plain ecoregion. Appendix G should be corrected as noted below.

(Only a portion of Appendix G is reproduced here).

APPENDIX N – TERRESTRIAL SPECIES STRATEGIES

There are a few minor errors in the terrestrial species strategies tables that comprise Appendix N. This should not be considered an exhaustive review of Appendix N. Rather, it is a correction of those obvious errors that have been identified during routine use of the WAP since its publication. Only the corrected portions of the tables are included below.

Additionally, there is some inconsistent use of this Table. Most of the content is in fact a repetition of conservation strategies listed in the WAP text. However, some “priority species research and survey needs” are also included in this Table. Future revisions should be consistent with content. Future revisions should either include all research needs or exclude all research needs.
