

NOTE:

Landing data provided is preliminary and subject to change. The historic rate projection is based on average weekly EEZ landings from the years 2014-2016. The current rate projection is based on the weekly rates observed during the current (2017) Federal red snapper season. Projections provided are intended to provide general guidance as to what might occur in the future based on what occurred in the past. Weather conditions and other factors could impact weekly landing rates and change the point where the Louisiana’s self-imposed limit is reached.

The table below contains preliminary recreational landing data by sub-sector and is subject to change.

Red Snapper Weekly Landing Estimates (39 Day Season)					
			Landing (Lbs)		
Week	Begin Date	End Date	Charter	Private	Total
24	6/12/2017	6/18/2017	19,263	59,148	78,411
25	6/19/2017	6/25/2017	37,568	33,030	70,598
26	6/26/2017	7/2/2017	16,640	34,100	50,740
Average Weekly Landing			24,491	42,092	66,583
