

The Deep South Center for Environmental Justice will sponsor a community training on the adverse health and environmental impacts of Plasma Arc Technology –a risky waste management technology being proposed to our city.

# Community Forum

## Risky Waste Technology - The Latest Threat to our Community

### Did You Know?

- Gasification and plasma incineration have a dismal track record plagued by malfunctions, explosions, and shut downs.
- Emissions from staged incinerators can be harmful to human health and the environment.
- Staged incinerators are often expensive and financially risky.

### Presenters

- Dr. Beverly Wright – Dillard University/ Deep South Center for Environmental Justice
- Bradley Angel – Greenaction for Health and Environmental Justice
- Darryl Malek-Wiley – Sierra Club
