Florida A&M University

Summer Teacher
Coastal Stewardship Program

Come learn about watersheds, water quality issues, wetlands, wildlife and more during a field-trip excursion along the Gulf of Mexico

**Purpose**
- Promote conservation and stewardship of the Gulf of Mexico and its resources
  - Provide tools to foster environmental literacy among K-12 students

**Benefits**
- Participate in hands-on environmental learning opportunities in labs and the field
  - Dialogue with scientists and natural resource professionals
  - Get trained on GLOBE protocols, data collection and GPS technology
  - Share ideas with other teachers on how to adapt science curriculum and develop lesson plans to include coastal stewardship
    - Paid travel expenses
    - Receive stipend and lab supplies
    - Earn professional development credits

**Open to K-12 science teachers**

**Program Dates:**
June 14, 2012 - June 28, 2012

**Application Deadline:**
May 11, 2012
