

New Webinar Series!

Third Tuesday of Every Month

Starting May 21, 2013

Sensible Steps to Healthier School Environments

In today's challenging financial climate, the ability to identify and take simple, affordable steps to help protect the health of students and staff in our schools has never been more important.

There's also tremendous benefit in using comprehensive, sustainable strategies that can bring people together to create and maintain environments that are conducive to learning, use resources efficiently, and reduce potential health risks for all of those who occupy our schools.

This webinar series will outline sensible, **voluntary, low or no cost steps** that school communities can take to create healthier environments in their buildings. The series will also feature local school district personnel from across the country presenting case studies and solutions they've actually applied in achieving this very important goal.

Designed to meet the needs of your entire school community!

- Facility managers
- Administrators
- School nurses
- Teachers
- Support staff
- Other stakeholders

Join us for this new, interactive webinar series.

Receive a certificate of completion documenting your participation in each webinar in the series.
